

The screenshot shows the IBM Maximo Assets application interface. At the top, the user is identified as 'ROCHELLE R PENNEY'. The main navigation bar includes tabs for 'List View', 'Asset', 'Spare Parts', 'Safety', 'Meters', 'Specifications', 'History', 'Work', 'Service Address', and 'Map'. A system message dialog is displayed in the center, with the following text: 'System Message', 'BMXAT0284E - The map component cannot be configured because the Map Manager configuration for the current user default insert site was not defined. Specify the default insert site in the Map Manager application.', and a 'Close' button. A red annotation box on the right contains the text: 'This tab not available; not needed for JBPHH to execute work.' with an arrow pointing to the 'Map' tab.
