# IN THE BEGINNING OF BARKING SANDS AVIATION THERE WAS JUST A FIELD....

## BARKING SANDS ARMY AIR BASE WORLD WAR II HISTORY

John D. Bennett

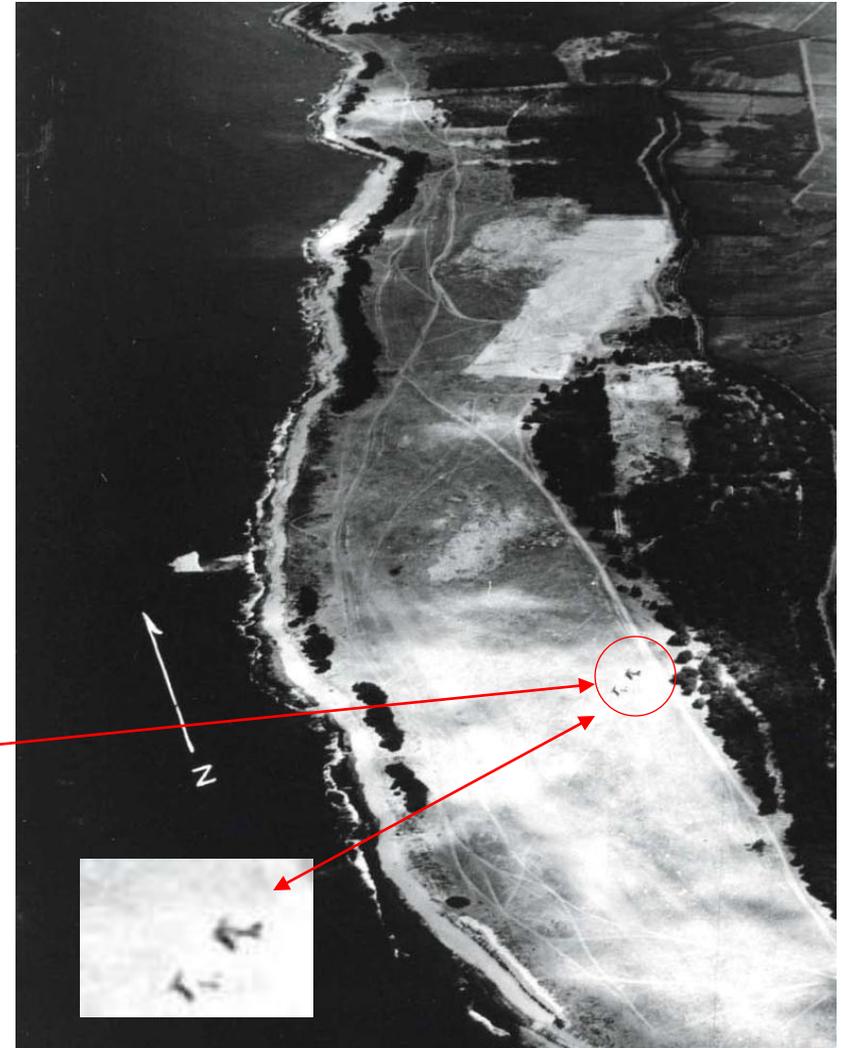

### Preface

The Army airfield which became Barking Sands Air Base (AB) in World War II was originally known as “Mana Airfield,” built on land acquired from the Knudsen family by Kekaha Sugar Company located nearby at Kekaha. The grassy airstrip first came into being around 1921. The airfield is situated on a narrow, flat, sandy coastal plain (Mana Plain) in the north-south direction bordering the Pacific Ocean on the west in the Waimea District of Kauai at general coordinates: N22.030513° - W159.786587° obtained via “Google Earth” ©2009 Google™. Large sand dunes (Nohili Dunes) are found on the east and north.<sup>1</sup> The beach area is known as “Barking Sands” so-called by a sound made when walking upon the sands.

In 1938, all Work Project Administration (WPA) expansion of Territorial airports in the Hawaiian Islands was placed under the direction of the Honolulu District Engineer, Corps of Engineers. Construction of the airfield soon began using WPA funds under the direction of the district engineer.<sup>2</sup> The airfield was utilized by Inter-Island Airways the forerunner of Hawaiian Airlines, and on occasion by Pan American Airways.<sup>3</sup>

The U.S. Army acquired 549 acres, including the grass airstrip in 1941 which became “Mana Airport Military Reservation” by Governor’s Executive Order 945 dated June 10, 1941 issued by Joseph Poindexter.<sup>4</sup> Additional land was acquired for a total of 2,058 acres. The airport experienced a great deal of military flight operations upon the onset of World War II.

# THEN THERE WAS THE SOUTHERN CROSS & CHARLES KINGSFORD SMITH

Southern Cross @ Wheeler Army Air Corps Field,  
Oahu, 1928

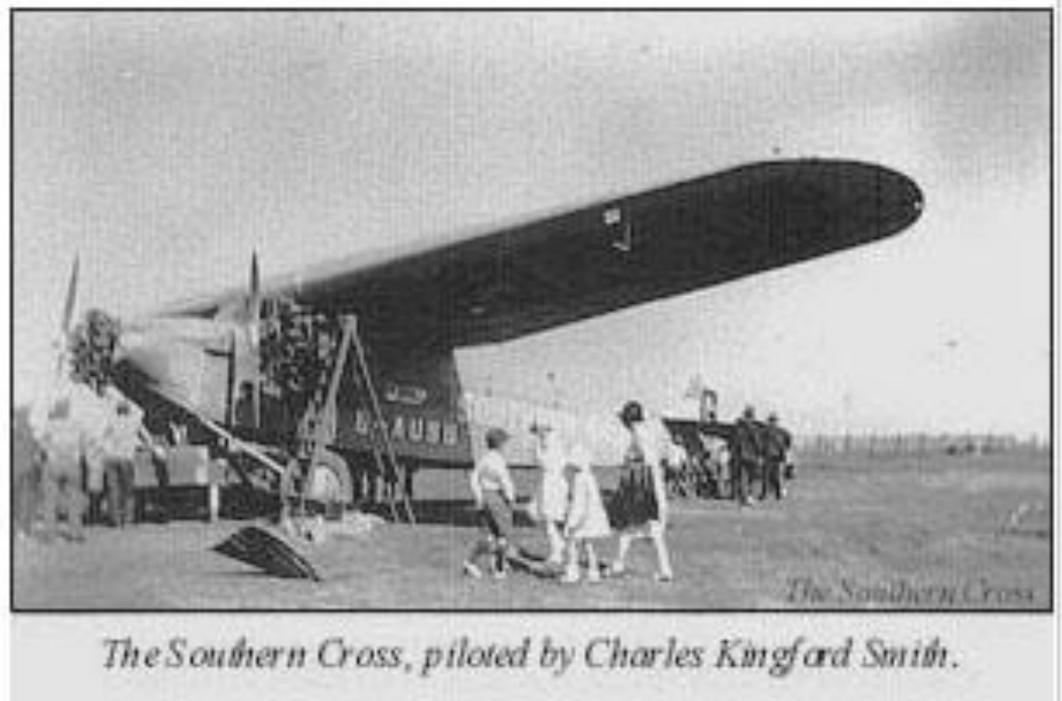

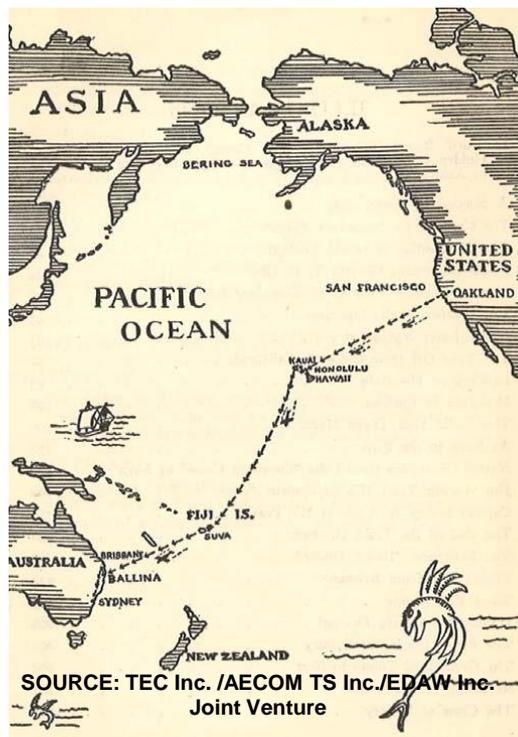

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

Southern Cross @ Wheeler Army Air Corps Field  
Oahu, 1928

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

The Southern Cross flew out of Barking Sands, where it was last fueled for the trip:

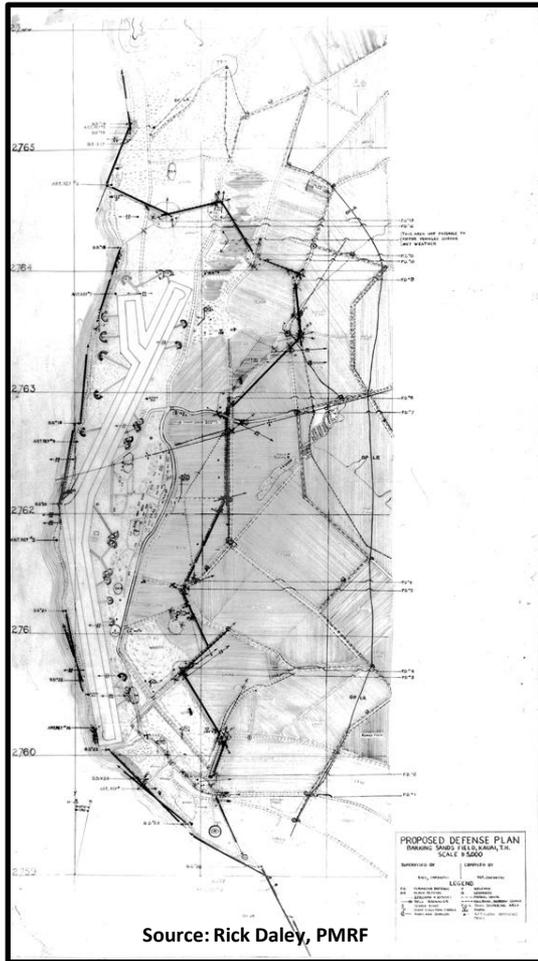

“Three miles West of *Mana*, lay the Barking Sands, an area that played an important role in the life of the people of *Mana*. Even as a very young boy, in May 1928, I had come to Barking Sands with my parents, my uncle Antone Martin, and hundreds of others, to see the famous Charles Kingsford Smith begin his flight to Australia. The 1927 Fokker tri-motor airplane was named *The Southern Cross*. Many other planes were there that day, most of them were military aircraft which had flown from Honolulu to witness this historic event. These were the first airplanes; I had ever seen. Twenty years later, in 1947, I would begin my career with Hawaiian Airlines at this very same place, Barking Sands.

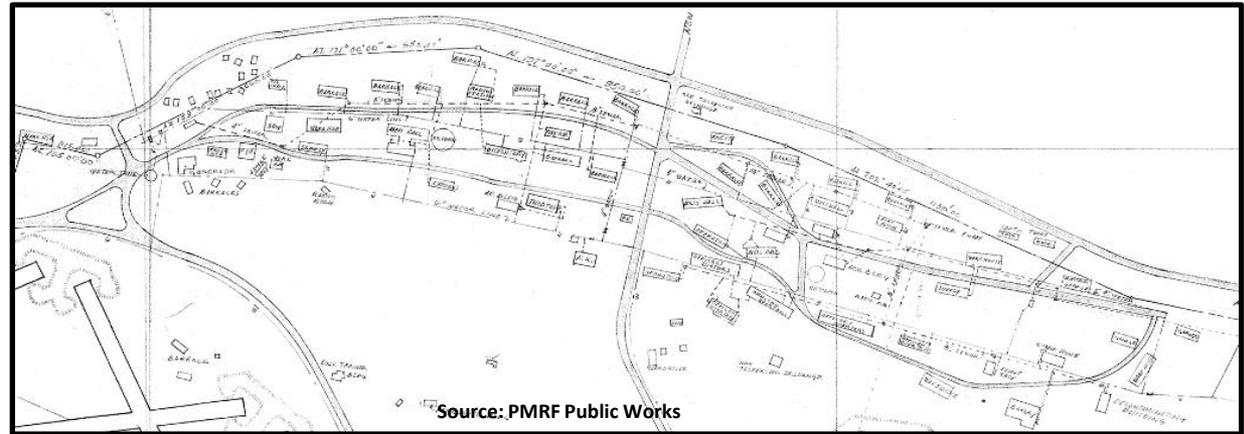

We watched, entranced, as his fuel-heavy airplane lifted a few feet off the ground, struggled to clear the low sand dunes along the shoreline, and disappeared behind them on its thirty-four hour and twenty-four minute flight to Suva, Fiji. That flight of 3,180 miles was the longest over water flight in the history of aviation.”

and Radioman Tom Stoops (Official Navy Photo)

COMPOSITE SQUADRON SIXTY-SIX (VC-66)  
SQUADRON PATCH

The squadron was designated “composite” because it was composed of two different type aircraft: single seat F4F “Wildcat” fighters and three man TBF “Avenger” torpedo bombers. In fact, VC-66 was to become the first squadron composed exclusively of the newer model “Avengers” and “Wildcats” built by the Eastern Aircraft Division of General Motors and known as TBMs and FMs rather than the earlier TBFs and F4Fs which were built by Grumman Aircraft.

Of the original 65 men assigned to the squadron, 15 – including the CO and XO – were fighter pilots, 12 were torpedo bomber pilots, 1 was an Engineering and Materiel Officer, 1 was an Air Combat Intelligence Officer, and the rest were enlisted Petty Officers – including 4 Chief Petty Officers.

With the exception of the CO, XO, and the few veteran Chief Petty Officers and Lieutenants, virtually all squadron personnel were new to the Navy, new to combat – and very young. Some were teenagers, most were in their early twenties. The oldest man in the squadron was thirty. He was called “Pop.” Some were married, most were not. They came from all over the country. In civilian life, they had been students, factory workers, forest rangers, semi-pro baseball players, biologists, engineers, artists, fishermen, college football players, musicians, cowboys, farmers, and reporters. Now, they were pilots, gunners, radiomen, or mechanics.. [Source: Stephen A. Banks’ “LOOKING BACKWARD: Don Banks – One TBF Turret Gunner’s Story”; used w/permission]

THE SEQUEL: It was later learned that there was a secret meeting held between Admiral Nimitz and President Roosevelt aboard ship - part of the "enemy surface force".

The entire VC-66 Unofficial Log will be posted elsewhere on this web site , along w/Chapter 11 from Stephen A. Banks' LOOKING BACKWARD: Don Banks – One TBF Turret Gunner's Story", describing life on Barking Sands w/VC-66.

## From the Unofficial Log of VC-66, dated 23 July 1944, while on NAS Kahului, Maui:

23- (Sunday) The squadron was awakened at 4 A.M. this morning by whistles and sirens of an alert, sounded throughout the entire Hawaiian chain. The officers were gathered from every part of the island, including Wailuku, and the slope of Mt.Haleakala. When everyone had raced madly over the blacked-out roads and assembled at the ready room, word came through that a possible enemy surface force had been contacted 200 miles north of Oahu. The pilots who believed the report were elated over the possibility of a crack at the Jap fleet. The other pilots remained sullenly skeptical. All planes were loaded in the dark and turned up by the pilots, who waited in the cockpits for word to take off. That word never came. Pilots and combat crews later returned to the ready room, where they were relieved in shifts for breakfast. Secure was sounded at 1000, six hours after the alert had been called. Later reports seemed to indicate that the presence of President Roosevelt in Pearl Harbor had prompted an exceptionally vigilant policy.

## Hawaiian Airlines on Barking Sands WWII

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

Hawaiian Airlines on  
Barking Sands  
WWII

Barking Sands hosted  
Hawaiian Airlines until the  
Lihue Airport was Constructed  
In 1950.

**IN THE EARLY 1950s, “BARKING SANDS AIR FORCE BASE” BECAME “BONHAM AIR FORCE BASE” IN HONOR OF MAJOR CARLOS W. BONHAM, COMMANDER, 199<sup>TH</sup> FIGHTER SQUADRON, AFTER THE MIDAIR COLLISION OF HIS AIR GUARD ‘JUG’ (P-47 “Thunderbolt” REDISGNATED “F-27” IN AIR GUARD SERVICE) AND ANOTHER F-47 ON A TRAINING ‘DOGFIGHT’ OVER THE CHANNEL BETWEEN BARKING SANDS AND NIIHAU**

FAREWELL BONNY. Barking Sands AFB. June 24, 1952.

NARRATIVE OF MEMORIAL SERVICES

FOR

MAJOR CARLOS W. BONHAM

COMMANDER, 199<sup>TH</sup> FIGHTER SQUADRON (SE)

HELD AT BONHAM AIR FORCE BASE  
(then Barking Sands Air Force Base)

TUESDAY 24 JUNE 1952

Maj. Bonham was killed June 15, 1952, in a midair collision while leading a flight of JUGs in acrobatics in-trail. The other pilot parachuted to safety in the sea between Barking Sands and the island of Niihau.

A flight of four F-47s was slowly orbiting over Hickam AFB at 1230 hours Tuesday 24 June 1952. A B-26 was parked on the ramp in front of Squadron headquarters; a double row of Air National Guardsmen formed an Honor Guard.

Captain Jarrett F. Carr carried the urn, followed by an airman with the Interment Flag, thru the saluting Honor Guard ranks to the B-26. Captain Joë W. Groom received the urn. Both of these officers fly for Hawaiian Airlines as their civilian occupation; they piloted the B-26 on its flight to Kauai.

The flight of F-47s escorted the B-26 to Bonham AFB. The B-26 landed, and taxied to the vicinity of the control tower. The entire Squadron, some 450 officers and airmen, were assembled there at attention. There were about thirty Squadron guests who represented Hawaiian Airlines, Hawaii National Guard, United States Air Force, as well as close personal friends.

A lone F-47 (with Captain Robert B. Maguire in the cockpit) was parked in front of the Squadron formation and near the B-26.

An Honor Guard, composed of the Air Police Element, marched forward and formed a double rank, facing in, between the B-26 and the lone F-47. The Colors moved forward midway between the two aircraft.

Chaplain (Major) Howard Gould (Protestant) of Hickam AFB said a short prayer over the urn. TSG Norman C. Ault, Jr. accepted the urn from the B-26 pilots and covered it with the Interment Flag.

Chaplain Gould, accompanied by ToG Ault with the urn, marched thru the saluting ranks of the Honor Guard to the lone F-47. They were followed by Major Robert M. Butler and CWO Joseph L. Barnett, who acted as honorary pall bearers. All those assembled were at present arms. Captain Maguire received the urn, and closed the cockpit canopy.

The Colors and honor Guard returned to their place in the formation. The lone F-47 cranked up, taxied to the runway, and took-off.

The Squadron marched across the runway to the sand dunes facing the island of Niihau. The Squadron guests were escorted over, and were assembled in four ranks behind the colors.

Chaplain Gould said a short service.....there was a two minute period of silence, broken only by the sound of the waves and the breakers on the shore.

The sound of an F-47 formation was heard; six F-47s flew in the form of a cross just off-shore along the coast line at a thousand feet elevation.

The lone F-47 followed about half a minute later. When Captain Maguire was in front of the troops, he distributed the ashes in the waters just off Bonham Air Force Base. All personnel were at present arms. When this lone F-47 passed, two buglers played echo taps.

A C-47 followed, dropping a full load of flowers, which drifted down over the sea.

As the marching Squadron returned across the runway, the entire Squadron of F-47s passed in review over the field at five hundred feet elevation in final tribute to their Squadron Commander.

Department of The Air Force  
Washington

General Orders  
Number 14

8 May 1953

Section 3

3. Air Force Installation. -- The Air Force installation known as  
Barking Sands Air Force Base, Territory of Hawaii, is redesignated  
Bonham Air Force Base, (in honor of Major Carlos M. Bonham) effective  
1 June 1953.

By Order Of The Secretary of The Air Force:

Official:

Hoyt S. Vandenberg  
Chief of Staff, United States Air Force

R. E. Thielbald  
Colonel, USAF  
Air Adjutant General

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

The P-47s, (designated F-47s), were in Hawaii Air Guard service until 1953...and then the first “jet fighter” (F-86L Saber) came to the 199<sup>th</sup> Fighter Squadron:

Eventually to be replaced by the F-102 – as the Cold War was in full swing

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

The HIANG used Bonham AFB as an outlying landing field for training and practice

SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines

**HIANG on Barking Sands, F-102s circa 1960s**

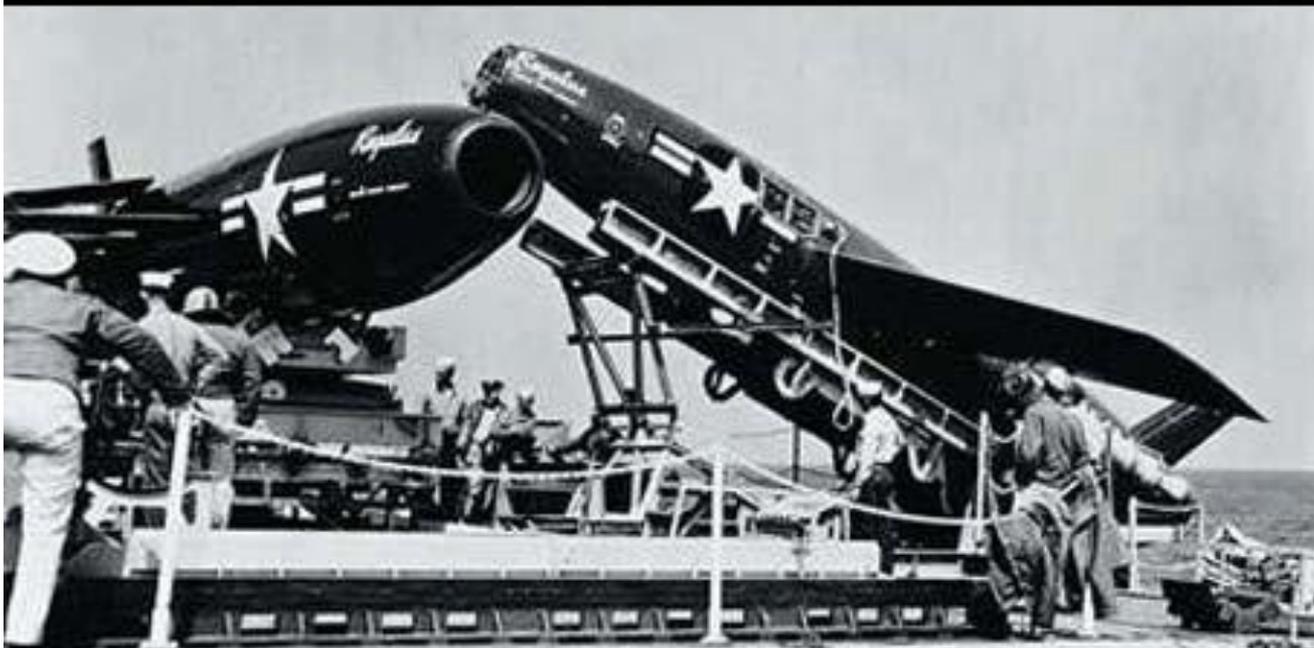

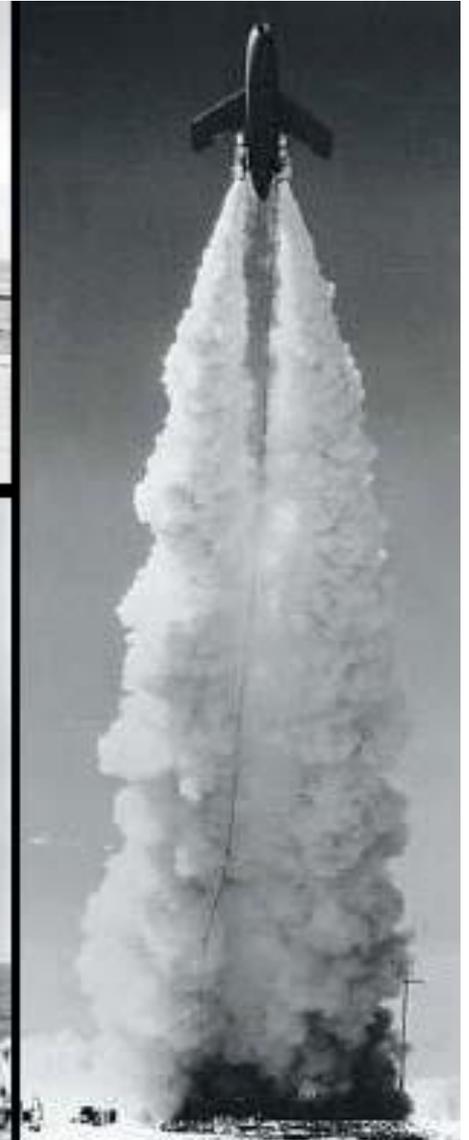

**SOURCE: CAPT Rick Rogers, Archivist, Hawaiian Airlines**

The Hawaii Air National Guard was created on Nov 4, 1946, with the 199<sup>th</sup> Fighter Squadron first flying war surplus P-47 Thunderbolts that were designated "F-47". The HIANG'S OFFICIAL BIRTHDATE IS Sept 18, 1947, when the USAF was formally established as a separate branch of service.

“The first major Cold War mission arrived at Bonham AFB in 1956. The Navy became a tenant at the airfield, making a five-year arrangement with the Air Force for the use of 37 acres to support a training mission for the Regulus guided (cruise) missile (Source: *Pacific Missile Range Facility (PMRF) Cultural Landscape Report – Final, August 2011*)
